SUMMARY

I am a Full Stack Developer passionate about data and machine learning. I excel in designing visually appealing websites and advanced web applications, blending technical skills with creative flair. I enjoy turning innovative ideas into digital reality, always striving for excellence and pushing boundaries.

Education

- Vivekanand Education Society (VES) Completed HSE in Scence with **90.2%** Scored **99.275%tile** in MH-CET 2022 (2020-2022)
- Bachelors in Technology in Computer Science and Engineering from Sardar Patel Institute of Technology (2022-Present)

Soft Skills

- **Decision making**
- **Hunger for excellence**
- **Multi-tasking**
- **Strategic Planning and communication**

Hard Skills

- Frontend: **HTML, CSS, Javascript, Tailwind, ReactJS, NextJS**
- Backend: **Python (Django, Flask)**
- Database: **SQL, SQLite, PostGreSQL**
- ML: **Scikit-learn**
- Python libraries like **NumPy, Pandas, Matplotlib, Beautiful Soup, Tkinter and Selenium.**
- Others: **GiT, Postman, Heroku, Vercel and CMS technologies**

Achievements

- **Secured a position in the top 10 at SPIT's SE Hackathon**

Experience

Lead SDE Intern
KothariTech | July 24-Aug24

- Developed an admin panel for Lofaz, an eCommerce platform like Shopify, featuring extensive data tables and a dashboard utilizing real-time data via API integration. Created a seller website with API and Redux integration, consistently meeting tight deadlines.

Web Developer Intern
Cognifyz Technologies | March 24-April 24

- Worked as a frontend developer at Cognifyz Technologies since a month, contributing to various projects including the creation of landing pages. Utilized proficiency in Tailwind CSS and JS to develop visually appealing and responsive UI.

Relevant Projects

Lofaz Sellers

- During my internship at a startup, I developed Web Lofaz,a robust e-commerce platform similar to Shopify.
- This site offers a comprehensive solution for streamlining online retail operations, management of product listings, orders, handle shipping and delivery logistics, and detailed sale analytics.

PetSmart

- PetSmart's hinge-style UI lets users swipe through pet profiles, care needs, and its medical history.
- Features like adoption management, QR code generation for pet info, a store locator, vet appointment booking and pet location tracking, ensuring comprehensive pet care.

SplitIt- An opensource to SplitWise

- SplitIt is a PWA that supports unequal/equal splitting, overall expense tracking, and 2D payment integration with Stripe.
- It features detailed charts for expense analysis, simplifies group expense management and helps users track and understand their spending effortlessly.
